STEPHANIE NAOUS

Paris, France | (+33)605601769 | stephanie0naous@gmail.com | LinkedIn

PROFESSIONAL SUMMARY

M2 student at Sorbonne Université pursuing Mechatronics, Artificial Intelligence and Robotic Systems, specializing in Collaborative Robotics. Passionate about robotics and its potential to improve people's lives, with a strong interest in research and continuous learning. Graduated with High Distinction in Mechanical Engineering from LAU and gained experience through robotics-related projects, research, and internships. Active in leadership and team-based activities, developing strong teamwork, communication, and problem-solving skills

EDUCATION

SORBONNE UNIVERSITE — **PARIS, FRANCE**

Master 2 student – M2 Mechatronics, Artificial Intelligence and Robotic Systems — *Sept*. 2026 – PRESENT

- Pursuing the Robotics Track, covering robotic systems, modeling, control, and estimation
- Specializing in Collaborative Robotics with a focus on human–robot interaction, haptics, teleoperation, and wearable robotics

LEBANESE AMERICAN UNIVERSITY — **BYBLOS, LEBANON**

Mechanical Engineering — *Sept*. 2022 – *May* 2026

- GPA: 3.86/4.00: Graduated with High Distinction, named on the Dean's distinguished list
- Selected to join the LAU Honor's program recognizing high-GPA students and promoting academic excellence

COLLEGE MARISTE CHAMPVILLE — **DIK EL MEHDI, LEBANON**

- Lebanese Baccalaureate – General Science – Grade: 18.0, ranked 22nd in Lebanon — *Aug*. 2022

RESEARCH EXPERIENCE

LEBANESE AMERICAN UNIVERSITY — **BYBLOS, LEBANON**

Undergraduate Research in Soft Wearable Robotics — *Sept. 2024 – Aug.* 2026

- Conducted research on the design and development of a soft, 3D-printable wearable device with integrated pressure sensing, to assist stroke patients in regaining functional grip control through haptic feedback
- Integrated augmented reality-based interactive feedback methods to enhance user engagement, rehabilitation accuracy, and sensing performance
- Contributed to the preparation of a research paper based on the project's design, development, and results, currently in preparation

PROJECTS

LEBANESE AMERICAN UNIVERSITY — **BYBLOS, LEBANON**

Final Year Project — *Sept. 2025 – May* 2026

- Designed and prototyped a functional cart integrating an intelligent electric power steering system with PID-based steering control to improve vehicle handling
- Developed an AI fuzzy logic-based adaptive controller using vehicle velocity, steering effort, and yaw rate to determine motor torque, and evaluated its performance in Simulink and on the physical prototype

Robot for visually impaired "Blinker" — *Jan.* 2024 – *Apr.* 2024

- Developed a dog-shaped mobile robot designed as a companion to assist visually impaired individuals in navigating campus environments through a leash-based navigation interface
- Designed and manufactured a six-wheel mobile robot using 3D-printed components and laser-cut aluminum sheets, with DC motors for mobility and stair climbing
- Programmed the robot using MyRIO and LabVIEW, integrating IR, ultrasonic, and IMU sensors for obstacle detection, avoidance, navigation, and audio feedback

PROFESSIONAL EXPERIENCE

MIDDLE EAST AIRLINES — **BEIRUT, LEBANON**

Intern at MEAG (Middle East Airlines Ground Handling) — *Jul 2025 – Aug. 2025*

- Assisted in the maintenance, troubleshooting, and performance evaluation of ground service vehicles and equipment, working with mechanical, electrical, and control systems to support operational readiness
- Gained hands-on experience with PLCs, sensors, and electromechanical systems through engine and equipment inspections, fault diagnostics, and safety compliance procedures

INTERPLAST CO. LTD. **DUBAI INVESTMENT PARK, UAE**

Intern *May 2025 – Jul. 2025*

- Monitored key machine parameters, analyzed production data, and identified process inefficiencies to enhance manufacturing performance, optimize workflow continuity, and support equipment reliability
- Assisted in quality control procedures, evaluated product conformity to specifications, and supported improvement efforts to increase production efficiency and maintain high manufacturing standards

SOCIAL EXPERIENCE AND VOLUNTEERING

AMERICAN SOCIETY OF MECHANICAL ENGINEERS **BYBLOS, LEBANON**

Vice President *Sept*. 2025 – *May 2026*

- Led and managed club operations to enhance engagement, outreach, and collaboration, resulting in an increase in sign-ups and an improvement in member satisfaction compared to the previous year

Head of Event Planning Committee *Sept*. 2024 – *Sept*. 2025

- Organized Engineering-centered events to increase the awareness and knowledge of Engineering students

YOUTH GROUP **BEIRUT, LEBANON**

Youth Group Leader *Oct*. 2021 – PRESENT

- Managing and engaging children aged 3-12, facilitating activities to boost cognitive development and social skills
- Coordinating with parents and organizing activities to support skill-building and future preparedness

LEBANESE AMERICAN UNIVERSITY

Engineering summer camp *June 2024 – July 2024*

- Assisted and supervised groups of high school students during hands-on engineering activities, providing guidance and support throughout technical projects

LANGUAGES

- French (C1) • English (C1) • Arabic (Native)

ADDITIONAL ACTIVITIES & ACHIEVEMENTS

- Piano player – 10 years of training *2010 – 2020*
- Track & Field – Top 5 in Lebanon in the 600m *2013-2018*
- Gymnastics – Two-time Top 3 in the National Championship *2013-2015*
